THE BEST NATURAL AND ECONOMIC BAITS TO CAPTURE:

All types of ordinary flies

0,5 ml of water and 20/30 grams of the wastes of raw fish (sardine for example)

Hornets and wasps (3 type of the baits to choose)

0,5 ml of the beer and 2 spoons of the sugar or honey

0,5 ml of the water + 3 spoons of the sugar or honey + 1 glass of the red vine vinegar

0,5 ml of the white sweet vine or sugar added + ½ glass of the mint syrup

Drosophila suzukii, commonly called the spotted-wing drosophila

250 ml of the honey vinegar + 100 ml of the red vine+ 1 spoon of the sugar

The codling moth, The Olive Moth, moths, butterflies and other lepidopterans

Macerate for 2 weeks 1 liter of the vine + 7 spoons of the sugar

+ 15 cloves + ½ half cinnamon stick. After 2 weeks passed add 3 litres of the water.

You will receive 4 litres of the bait that you can use for 8 bottles

(1/2 of the liter of the bait for everyone)

The Mediterranean fruit fly, or medfly for short, or fruit fly (cherry tree, olive, nut tree, citrus etc.)

½ liter of the liquid ammonia (for cleaning use, unscented)

+ 20/30 grams of the wastes of raw fish (sardine for example)

YOU CAN APPLY THE INSECT TRAP:

Gardens, Olive groves, Orchards, Vineyards, stables, open places (like: bar, restaurants, parks, camping), FARMS, STALLS, KENNELS, HEN-HOUSES

HOW TO USE INSECT TRAP:

- it's let us to capture all off harmful insects without use of the poison or chemical substances.

- Once when the bait inserted in to the bottle you should appile the insect trap that you must simply screw instead of the screw top of the plastic bottle.

- Insect trap have the universal thread conceived to be use for different types of the bottles.

If you have the difficult to screw up correctly the insect trap, because the bottle don't have the universal thread, you should simply go on to screw until the thread hooking firmly.

The traps must be position and visible on the plants or in the different open places about 1,5 mt high or a little bit higher on the south, southwest.

- we advise you to use the 1,5/ 2 litres bottles for doses of the baits as stated above

- for the plants with sufficient crown we recommended to apply 4 bottles
